

TRANSBUILD | COMMERCIAL

FAST AND EFFICIENT - SIMPLY A GOOD BUSINESS DECISION

As the needs of the building industry rapidly evolves, our customer's needs are becoming increasingly diverse and spatially focused. We proudly deliver an uncomplicated, speedy solution with cost certainty and time frame, in as little as six weeks. Quality, architecturally designed, transportable buildings are simply becoming an option for many that must be explored.

When you opt into a truly transportable building, the time improvements on a project can be outstanding. We deliver our buildings as one single unit on the back of a specialist moving truck (8m + wide). Completed in our undercover factory and fit for purpose on day of delivery once the services have been connected to the site source.

Site works and building work can occur concurrently, and our all weather factory combined with a planned approach to manufacturing means we enjoy speedy completion dates without experiencing weather or sub contractor delays.

"We had a 2 week window while the students were on holiday, drainage commenced the day after break up on Saturday for all the site services to be installed safely without kids around. Our brand new classroom was delivered at the end of that first week and when they came back after a 2 week holiday our planting made it look like it had been there for months. Brand new and warm, and it looks like it has been there for years already!" HELENSVILLE DAYCARE CENTRE

Transbuild Commercial are purpose built brand new buildings - architecturally designed with energy efficient design principals in mind to ensure that we tick health, safety and wellness boxes with insulation, certifications and a modern, comfortable environment while standing the test of time. We know and understand the high standards required for commercial builds notably RSE, Education and Government building regulations.

Refer to www.transbuild.co.nz/commercial for indicative layouts, but please note typically commercial builds require customised design amends due to council requirements e.g. fire walls. Prices are available on request, email your plan to us at enquiries@transbuild.co.nz or call to discuss on 0800 460 307.

Note. There are many efficiencies to be had in multiple builds, we are happy to discuss your specific requirements.

Transbuild is a proud New Zealand owned and operated business and we prioritise supporting our local economy. We recycle, reduce waste and ensure that our products are delivered to New Zealand building code standards.
